WHAT MAKES SONOGRAPHY UNIQUE AT ST. KATE’S?

- St. Kate’s sonography program is one of two institutions in the upper Midwest that prepares students for advanced-level practice with a Bachelor of Science degree.
- St. Kate’s sonography students benefit from having superior clinical sites in major medical centers all located within the Twin City metro area, allowing students to integrate their clinical learning with classroom instruction.
- Sonography students benefit from the unique component of Inter-professional Education courses, which guide students to work effectively as a health care team member with other health care professionals.
- Students benefit from small class size and close, supportive relationships with faculty known for providing relationship-centered education. The program boasts rich diversity among its students.
- We use a one-to-one student and preceptor/practitioner model for teaching. You will work side-by-side with an expert in the field to develop hands-on lab scanning clinical skills. As a Sonography major, you will experience approximately 1000 hours of clinical experience that prepares you for general sonography upon graduation.
- Graduates of this program are well prepared to provide excellent patient care and influence the quality of health care services in diverse practice settings.
- Majors will benefit from highly qualified faculty who are experts in their fields and specialize in a number of areas including abdominal, OB/GYN, and Vascular. Faculty are active in the field and actively involved with professional organizations such as the Minnesota Society of Diagnostic Ultrasound (MDSU) and the Society of Diagnostic Medical Sonographers (SDMS).
- Sonography students from St. Catherine University will graduate with leadership skills positioning them for management positions.
- St. Kate’s Sonography most recent graduates have enjoyed a 100 % job placement rate. Additionally, St. Kate’s students have earned a passing rate of 100 percent on the SPI exam and 100% on the OB/GYN and 89% on the Abdominal exam administered by the American Registry for Diagnostic Medical Sonography (ARDMS).
“Advising is so high on our radar. We make sure our students stay on track; we evaluate their progress often. We talk about their academic progress, their communication skills, how they are interacting with their cohort as well as help them develop very important professional behaviors.”
Tammi Wiesner, Instructor and Clinical Coordinator

Before you register for classes:

- Make sure you resolve any “HOLDS” placed on your student account which will prevent you from registering. Check the HOLD link on KateWay. Holds are placed on your record for a variety of reasons; refer to the HOLD table (see Registration Help – Holds) to determine your course of action.
- Meet with your assigned advisor to confirm or change your course plan. As you consider minors or double majors, go to Degree Evaluation and conduct “What If” scenarios to see what courses are necessary.
- First-year, sophomore and junior students must obtain a PIN number from their advisor in order to register; senior students should meet with their advisor prior to every registration to ensure they are meeting graduation requirements.
- Declare your major by April 1; go to the Student tab on KateWay to access the form and to review your academic profile. To officially declare, go to “Change your Record” to indicate your major.

ACADEMIC AND ADVISING CONNECTIONS

- Connect to the University through the New Student Orientation program.
- Meet with your First-year Advisor throughout fall semester; discuss the results of the Mapworks Survey and identify resources that will get you on the track to success. Know who your Campus Connections are and seek their support when needed.
- Engage in the TRW Salons: learn what it means to be a woman educated in the liberal arts.
- Discuss your first-year course selection with Academic Advising, x6803. Make sure you earn the required grades in the pre-requisite courses to insure a strong application to the sonography program during your sophomore year.
- Sign up for volunteer opportunities within healthcare settings including hospitals and nursing homes. Develop strong interpersonal skills as well as a comfort level in working with patients. You need a minimum of 50 volunteer hours to apply to the Sonography program. Contact Susan Trelstad, Department Chair, sdtrelstad@stkate.edu, for information on volunteer opportunities with partner organizations located in the Twin Cities.
- Contact Career Development for names of sonography alumnae and arrange to conduct informational interviews to expand your knowledge of their day-to-day work.
- Strengthen your writing and math skills at the O’Neill Center for Academic Development.
- Meet with your financial aid counselor to review your financial and academic plan in order to complete your degree in the time frame you have identified.

CAREER DEVELOPMENT

Consider ways to connect your Sonography major and interests to your future career plans

- Apply for student employment, internships, and jobs. Start by logging in to Katie-Career and completing your profile. You’ll need a résumé and cover letter to apply; Career Development can help you with this.

SOCIAL JUSTICE AND SPIRITUAL DEVELOPMENT

Learn about St. Kate’s mission of social justice

- Take advantage of opportunities in Campus Ministry: sing, play an instrument, or perform liturgical dance. Explore faith-in-action through volunteer work or participation in a Justice Learning and Outreach trip (January or March). Contact Campus Ministry if interested.
- Attend the annual Myser Initiative on Catholic Identity lecture to hear from noted Catholic speakers.
- Develop a daily practice of reflection and mediation. Take advantage of the campus environment, grounds, Chapel, or other spaces you find solace.
- Act on St. Kate’s commitment to justice through service-learning opportunities such as Volunteers in Action, Justice Learning & Outreach trips coordinated by Campus Ministry, and off-campus student employment such as America Reads coordinated by the Center for Community Work and Learning. Review courses offered each term that offer a service-learning component.

COMMUNITY CONNECTIONS

Get Involved in Campus Life

- Attend the annual Activities Fair in September. Join the Medical Interest Group! Another Activities Fair takes place during February.
- Attend an event at The O’Shaughnessy — one of the Twin Cities’ premier theater venues right on campus!
- Develop financial management skills; attend the college-wide, Money Management speaker series or register for the 2-credit course INDI 2010: Personal Financial Fitness (only for first and second year students).
- Become an active member of a club and/or organization that captures your interests.
- Review your Campus Connections and available Campus Resources by going to your Mapworks portal on KateWay.
Suggestions for making connections to your developing career goals.

“We live St. Catherine’s mission everyday … the mission statement is part of our daily discussions in the classroom and is realized in the clinical experience with underserved populations.”
Susan Trelstad, Assistant Professor & Department Chair

ACADEMIC AND ADVISING CONNECTIONS
- Attend the Second Year Celebration as a second-year student at St. Kate’s. This is an important initiation event for scholars at St. Catherine University.
- Review the results of the fall Mapworks Survey. Discuss campus resources that will support your success.
- Make sure you are following the Sonography Program planning document. Meet with department faculty to ensure you are on the right track.
- Talk with staff in the Office of Global Studies to plan a study-abroad experience. Get in touch with Global Studies early on to identify programs that will best fit into your academic planning. J-term and summer opportunities are also available.
- Take advantage of the faculty’s “open-office-door” policy. Stop in to learn about course offerings and share your specific interests. Ask your advisor about a double major the possibilities of integrating your interests with another major at St. Kate’s.
- Visit the various websites of the Sonography department’s Clinical Affiliates and learn about the organization you will be involved in. Research the facilities and, in particular, the sonography departments.
- Strive to earn a strong GPA to be accepted into the Sonography program and the Antonian Honor’s Program, be recognized on the Dean’s List, and to be considered for prestigious postgraduate scholarships and fellowships, and other University honors and awards.
- Once you are officially accepted into the program during spring term, officially declare your major. Go to the Student tab in KateWay and review your Academic Profile. Complete the online form to declare your major before reaching junior status (60 credits). Complete a Degree Evaluation, then meet with your advisor to identify which major, minor, liberal arts core and other graduation requirements you have left to complete.
- Check in with your financial aid counselor to review your status of your financial and academic plan.

SOCIAL JUSTICE AND SPIRITUAL DEVELOPMENT
- Enroll in a service-learning course (designated on the course schedule). Apply classroom theory to practice.
- Attend the Chili and Cornbread events offered in the Multicultural and International Programs and Services (MIPS) office to discuss important and engaging topics on diversity and inclusion.
- Take time away to reflect and deepen your faith by participating in the Fall Overnight Retreat and/or Lenten Retreat in the spring

LEADERSHIP DEVELOPMENT AND STUDENT EMPLOYMENT
- Build your leadership skills. Take a leadership role in Student Senate, the Sonography Club or other organization, LEAD Team, Students Who Are Parents (SWAP), Social Events and Experiences for Katies (SEEK). Serve as a Student Center building manager, an Orientation Leader or in other campus employment positions.
- Consider serving as a teaching assistant, research assistant or program collaborator in the Assistantship Mentoring Program (AMP) with faculty in the department. Expand your degree and your résumé by participating in this unique program. Contact AMP staff in Center for Community Work and Learning, x8642.

Applying to the Major:
All students must apply to enter Sonography major during their second semester of their sophomore year. Applications are available through the department.

Admission is contingent on:
- Successful completion of prerequisite courses (C or above) with a GPA of 2.5 in those courses; no courses can be taken S/U
- If a prerequisite course grade is C- or lower, this course (or an alternative course approved by the Program Director) must be repeated no more than once. Student may have only one withdrawal (W) in a prerequisite course. A minimum grade of C must be achieved in the repeated or substituted course. If the student receives two more prerequisite course grades of W or C- or lower, the student is ineligible for the sonography major.
- Meet physical requirements listed in “Required Skills to enter the Sonography Profession”
  - 30 credits completed
  - Availability of space (contact the Program Director, Susan Trelstad. for more information, sdtrelstad@stkate.edu
  - A minimum of 50 hours volunteering in health care setting

There are a specified number of students who can apply to the Guaranteed Admission Program (GAP) during their senior year of high school, who meet the admission criteria. See the Admission office for details.

As a transfer student, you are encouraged to meet with one of the department’s faculty members early on to map out your academic plan.
CAREER DEVELOPMENT

- Continue to research the Sonography field. Visit the Career Development library and website to learn all you can about the profession, employment outlook, etc. Obtain alumnae names and continue to conduct informational interviews with Sonographers in the field. Learn about the various certifications sonographers earn.
- Conduct informational interviews with Sonography alumnae. Contact Career Development staff to help you develop these important contacts. Talk to your professors as well: invite them to share their wisdom, reflections and their personal networks.
- Review the Minnesota Department of Employment and Economic Development Sonographers Data as well as the Sonographers statistics which can be found on the United States Department of Labor, Bureau of Labor Statistics (available on the Career Development website).
- Talk to your advisor about work environment options available to sonographers.

Tips for Transfer Students

- Know that you are not alone: a number of Sonography majors transfer to St. Kate's.
- Meet with a member of Sonography department faculty to develop an academic plan and identify courses to take.
- Review the St. Catherine University Evaluation System for Transfer Equivalency Information as well as the Sonography Program Planning document to determine courses needed. (Type “Transfer” in the search bar on KateWay to obtain transfer equivalency information.)
- Read through the St. Catherine Experience advising tool in full to identify past opportunities you may want to investigate.

Technical Skills Required to Enter the Sonography Profession

Discuss the following requirements to enter this profession with your advisor to make sure you are able to identify ways that you will develop these prior to graduation. The professional responsibilities include, but are not limited to:

- Obtaining and recording an accurate patient history
- Performing diagnostic procedures and obtaining diagnostic images
- Analyzing technical information
- Using independent judgment in recognizing the need to extend the scope of the procedure according to the diagnostic findings
- Providing quality patient care
- Collaborating with physician and other members of the health care team

Sonographers must also be knowledgeable about and limit the risk from possible exposure to blood and body fluids. Many sonographers also assist in electronic and clerical scheduling, record keeping, and computerized image archiving. Sonographers may also have managerial or supervisory responsibility.

Sonographers must be able to:

- Lift more than 50 pounds routinely
- Push and pull routinely
- Bend and stoop routinely
- Have full use of both hands, wrists and shoulders
- Grasp small objects and adjust small dials and switches
- Distinguish audible sounds and engage in normal volume conversation from of distance of 20 feet
- Adequately evaluate different shades of gray, including color distinctions
- Work standing on feet 80% of the time
- Interact compassionately and effectively with the sick or injured and observe their condition from a distance
- Assist patients on and off examining tables
- Communicate effectively with patients and other health care professionals
- Organize and accurately perform the individual steps in a sonographic procedure in the proper sequence
- Read various print size in a darkened room
- Work under stress
- Recognize and respond to alarms
- Retain large amount of technical information
Suggestions for making connections to your major.

“Students are well supported throughout their clinical experiences. Faculty will meet at the student’s clinical site two to three times per semester, providing them with ongoing feedback, evaluation and mentoring. We talk about the things that are apt to hinder them in the field as well as healthcare in general, and what skills will set them apart.”

Robert Naughton, Assistant Professor and Clinical Coordinator

ACADEMIC AND ADVISING CONNECTIONS

- Discuss fall and spring course planning with your advisor using the Sonography Program planning document to make sure you are fitting in all that you want in your education, e.g., global studies, etc.
- Discuss opportunities to present research you have conducted or a paper at the St. Kate's Scholarship Symposium or submit your work for consideration for one of the monetary Writing Awards in the spring (see the “Enhance Your Major” highlighted box).
- Continue to strive for a strong GPA that will enable you to be on the Dean’s List, and other academic awards.
- Talk with a faculty member about opportunities to conduct research during the summer in the Undergraduate Collaborative Research program. Share your research interests and plan early so you do not miss deadlines.
- Plan for your Global Search for Justice course: study and reflect on social justice issues. Consider choosing a section that offers an off-campus learning component such as service learning or study abroad.
- Complete and submit the “Declaration of Intent to Graduate” form by May 15 if you are graduating in December of the next academic year. Go to KateWay, My Education tab.
- Review your Degree Evaluation with your financial aid counselor to ensure your financial aid covers your remaining academic plan. Explore scholarship options that may be available to you.

CAREER DEVELOPMENT

- Attend the Annual Career Opportunities Fair and Government & Non-Profit Career Fair (fall) to explore opportunities. Practice your interviewing skills for internships and employment opportunities.
- Utilize the graduate school resources in the Career Development library or on the Career Development website if you are considering graduate school. Attend the Graduate School Fair in October. Start the application process early, consider the application process like a course itself! Talk with a career counselor about the pros and cons of attending graduate school right after graduation.
- Finalize a draft of your résumé with a career counselor.
- Consider creating an electronic portfolio on D2L to highlight your skills and accomplishments. Another electronic portfolio option is the eFolioMinnesota website at efoliominnesota.com for information. Wondering what to include in a portfolio? Meet with one of the career counselors in Career Development for information and guidance.

LEADERSHIP AND STUDENT EMPLOYMENT

- Serve as an officer in the Sonography Club, the Medical Interest Club or another club or organization of which you are a part. Develop important leadership skills to enhance your résumé.
- If you have not done so yet, inquire about serving as a lab assistant in the department. Add the important skills of teaching, interpersonal communication, listening, and evaluation to your list of transferable skills for your resume.

Study Abroad Experiences

Develop the skills, abilities, and qualities that result from international experience and that employers look for: cooperative problem solving, tolerance for ambiguity, respect for diversity, open-mindedness, self-reliance, and adaptability.

Learn the best time for Sonography majors to study abroad by visiting with staff in Global Studies as well as with your faculty advisor. Find out which Core Curriculum courses can be satisfied abroad including Fine Arts, History and Literature. Start planning during your first year for best results. January term options for elective or liberal arts requirements are available any time.

Discuss the possibility of taking HLTH 4994: Social Determinants of Health in the Caribbean: An Inter-Professional Experience with your advisor. This course is offered during J-term in Havana, Cuba, Santiago and Santo Domingo, Dominican Republic.

Meet with staff in Global Studies early in your academic planning for best options. Your advisor, the department chair and Global Studies staff have information on the best study abroad programs for completing major courses and staying on track for graduation.

Attend the Study Abroad Fair in February. Application deadline for spring semester is October 1; for summer, fall or year-long programs is March 1. J-term priority application deadline is mid-April.
SOCIAL JUSTICE AND SPIRITUAL DEVELOPMENT

- Consider serving as a student leader in Campus Ministry working to build an inclusive community of faith on campus.
- Live out the CSJs commitment to “love of God and dear neighbor without distinction” by participating in an immersion trip over spring break.
- Explore justice immersion trips including international opportunities, sponsored by Campus Ministry.

Enhance your Sonography Major • Choose 2 (or more!)

Consider these academic, scholarly opportunities to build your résumé and overall St. Catherine experience.

- **Antonian Scholars Honors Program** will challenge you academically. Discuss criteria with your academic advisor. The Antonian Scholars Honors Program offers students of superior ability and motivation an opportunity to study and work with peers and with faculty mentors in a specially designed program of the liberal arts. It is comprised of interdisciplinary honors seminars or a combination of at least 2 seminars and pre-approved equivalents, and an independent research study conducted during the senior year. Contact your advisor for more information, pick up a copy of the St. Catherine Experience Antonian Scholars Honors Program Guide or visit the Antonian Scholars Honors website on KateWay.

- **Conduct a research project** and present your results at a regional or national conferences. Also, consider sharing your research at the Sister Seraphim Gibbons Undergraduate Research Symposium your senior year. Discuss options with your advisor.

- **Study abroad!** Consider taking CORE courses in a study abroad program. Contact Global Studies to review programs that will best fit into your academic plan. Also, HLTH 4994: Social Determinants of Health in the Caribbean: An Inter-Professional Experience is a wonderful course to develop inter-professional skills that will enhance your degree.

- **Apply for an Assistantship Mentoring Program (AMP)** for your junior and senior years. The Assistantship Mentoring Program provides meaningful, well-paid student employment that challenges students to apply academic learning and prepare for their careers by working one-to-one with a staff or faculty mentor. Through AMP, students participate in a scholarly community enabling them to apply academic and co-curricular learning in meaningful experiences that gives them a competitive edge with employers and graduate admissions.

- **Apply for the Undergraduate Summer Research Program.** Work side-by-side with a faculty member on original research and earn a generous stipend in one of these great opportunities to add to your résumé and/or experience for graduate school. Year-long and summer opportunities are available. Inquire with any of the Sonography professors.

- **Present/submit a paper** for one of the University scholarships or monetary awards including the annual Awards for Research and Creative Work (through the Abigail Quigley McCarthy Center for Women), Bonnie Jean Kelly and Joan Kelly Student Excellence Awards in Creative & Scholarly Writing and the O’Leary McCarthy Scholarship for Excellence in Undergraduate Writing. For more information on these two awards, go to the Writing Intensive Program homepage on KateWay, then Student Resource tab and Writing Awards.

- **Inquire about Post Graduate National Fellowship and Scholarship opportunities.** Students seeking post-graduate fellowships and scholarships, including Fulbright, Rhodes, Truman, Marshall, Rotary and Goldwater can receive expert advice through a mentoring program. They can also receive funding to prepare materials for submission and interviews. The application process for these prestigious programs requires thoughtfull planning and mentoring from faculty. PLAN AHEAD. Contact Dr. Lynda Szymanski, Professor of Psychology and Director of Collaborative Undergraduate Research, x6625, laszymanski@stkate.edu.

Spiritual Development  | Meaningful Mentoring  | Diversity and Global Perspectives  | Preparing for the Future  |
Suggestions for making connections to your profession and to your life after graduation.

“We spend a great deal of time discussing ethics and how those play out in our profession. Our students graduate with an appreciation of this as well as what it means to be a professional.”

Susan Trelstad, Assistant Professor and Department Chair

ACADEMIC AND ADVISING CONNECTIONS

- Discuss the opportunity to present your research at the Sister Seraphim Gibbons Undergraduate Research Symposium, an on-campus event held each spring that celebrates student scholarship and collaborative research.
- Complete and submit the “Declaration of Intent to Graduate” form by November 30 if you are graduating in May. Go to KateWay, My Education tab. Meet with your academic advisor to prepare for graduation by reviewing the Degree Evaluation and the Academic Catalog. Make adjustments as necessary. (Go to Student tab in KateWay, link to Degree Evaluation.
- Review the list of Professional Responsibilities required of Sonographers. Discuss areas that need future development and identify strategies that will enable you to develop these prior to graduation. (See highlighted box).
- Meet with your financial aid counselor to prepare for financial responsibilities following graduation. Understand the options available for loan repayment. Attend the Money Management speaker series to develop skills of financial management.

CAREER DEVELOPMENT

- Meet with a Career Counselor to ensure you have developed a job search plan; finalize your résumé and practice your interviewing and networking skills. Connect with alumnae and attend events sponsored by professional organizations.
- Use your Career Development “Senior Planner” to help successfully plan this year.
- Identify faculty and staff on campus who could serve as references for your job search. Make sure you develop appropriate time lines so that you are able to meet deadlines for completed applications.
- Attend the Twin Cities Graduate School Fair in the fall. Make sure you are aware of deadlines and application procedures if you plan to attend graduate or professional school. Complete graduate school applications if you hope to attend in fall semester of the next year. Most doctoral program applications are due in December or January for fall admittance. Master-level programs sometimes have later deadlines. Explore scholarship available for graduate school. View information on the Career Development and Financial Aid website.
- Make sure your résumé has been professionally reviewed, that you are able to clearly articulate your skills/knowledge and experience confidently, and that you are prepared for interviews. (Résumé review and job interview coaching available in Career Development.)

LEADERSHIP DEVELOPMENT

- Mentor other students for leadership roles within the department and in student organizations to which you belong.
- Serve as a Chair for a club/organization in which you are involved.

Student Employment Opportunities in the Sonography Department

Consider student employment within the Sonography department as the Lab Assistant, available to an upper-level student. Inquire within the department if interested. Other student employment positions can be found at KatieCareer, St. Kate’s jobs and internship database. Inquire at Career Development. On-campus positions are convenient and offer flexibility to student schedules.

Career Paths for Sonography Majors

The Sonography Program post-graduate survey results indicate 100% employment within the first six months of graduating. In addition to performing therapeutic and diagnostic procedures, Sonography graduates find satisfying employment in the areas of General, Vascular and OB/GYN with appropriate certifications.

A sampling of our graduates …

Laura Hermes ’13, Sonographer Technologist, HealthEast, St. Paul, Minnesota
Mollie Kelly, RDMS ’12, Diagnostic Medical Sonographer, Park Nicollet Health Services, Greater Minneapolis-St. Paul Area
Melissa Pettyjohn ’07, Sonographer, Gillette Children’s Specialty Healthcare, Minneapolis, Minnesota
Brittany Timmerman ’13, Sonographer, Mayo Clinic, Rochester, Minnesota Area
Jessica Udoka ’09, Sonographer, HCMC, Minneapolis, Minnesota

Student Employment Opportunities in the Sonography Department

Consider student employment within the Sonography department as the Lab Assistant, available to an upper-level student. Inquire within the department if interested. Other student employment positions can be found at KatieCareer, St. Kate’s jobs and internship database. Inquire at Career Development. On-campus positions are convenient and offer flexibility to student schedules.

Career Paths for Sonography Majors

The Sonography Program post-graduate survey results indicate 100% employment within the first six months of graduating. In addition to performing therapeutic and diagnostic procedures, Sonography graduates find satisfying employment in the areas of General, Vascular and OB/GYN with appropriate certifications.

SPIRITUAL DEVELOPMENT
❑ Take time to reflect on the amazing education you have received; for the compassionate faculty who have nurtured your skills, knowledge, and passion for the arts; for those who have provided meaningful mentoring throughout your education; and for the holistic education you have experienced at St. Kate’s.

COMMUNITY CONNECTIONS
❑ Consider postgraduate service to further live out St. Kate’s commitment to social justice. Learn about opportunities in the Center for Community Work and Learning.
❑ Celebrate graduation and all your accomplishments. Celebrate your own academic achievements as well as those of your peers at the annual Honors and Awards ceremony held early May.
❑ As you prepare for graduation, celebrate all your connections to the University, including mentoring relationships with faculty and staff and lifelong friendships with your classmates.
❑ Become oriented to Alumnae Relations, and learn how to become an active and supportive alumna of the University.

Professional Organizations and Professional Development Opportunities
Become involved with the professional organizations that support your career.

Midwest Society of Diagnostic Ultrasound, (MSDU). The purpose of MSDU is to promote, advance and educate its members and the medical community in the science of diagnostic medical sonography. The organization continually strives to raise the standard of ultrasound practice within the state of Minnesota through education activities and the distribution of the MSDU newsletter. Students may attend the annual spring conference. msdu.org

American Registry of Diagnostic Medical Sonography, (ARDMS). ardms.org

Society of Diagnostic Medical Sonographers, (SDMS). sdms.org

Joint Review Committee in Diagnostic Medical Sonography, (JRC-DMS). jrcdms.org

Commission on Accreditation of Allied Health Education Programs, (CAAHEP). caahep.org

American Registry of Radiologic Technologists,(ARRT). arrt.org

Strive to become your best….
Consider these academic, scholarly opportunities to build your résumé and overall St. Catherine experience.

Antonian Scholars Honors Program will challenge you academically. Discuss criteria with your academic advisor. The Antonian Scholars Honors Program offers students of superior ability and motivation an opportunity to study and work with peers and with faculty mentors in a specially designed program of the liberal arts. It is comprised of interdisciplinary honors seminars or a combination of at least two seminars and pre-approved equivalents, and an independent research study conducted during the senior year. Contact your advisor for more information, pick up a copy of the SCE Antonian Scholars Honors Program Guide or visit the Antonian Scholars Honors website

Phi Beta Kappa is the nation’s oldest and most prestigious undergraduate honor society which recognizes achievement in the liberal arts. Sonography majors who choose to double major with a liberal arts major should contact Art and Art History Professor Amy Hamlin, Chapter President or Biology Professor Martha Phillips, Secretary for more information.

Post Graduate National Fellowships and Scholarships Students seeking post-graduate fellowships and scholarships, including Fulbright, Rhodes, Truman, Marshall, Rotary and Goldwater can receive expert advice through a mentoring program. They can also receive funding to prepare materials for submission and interviews. The application process for these prestigious programs takes thoughtful planning and mentoring from faculty. Plan ahead. Contact: Dr. Lynda Szymanski, Professor of Psychology and Director of Collaborative Undergraduate Research, x6625, laszymanski@stkate.edu.
